

fielder Copper 25

Contains : 250 gm/l Copper

An inorganic liquid formulation containing a high concentration of copper ideally suited for tank mix situations

Recommendations for use:

Rates Of Application

Maintenance

Apply 0.25 l/ha as soon as there is sufficient leaf area to absorb the spray.

Deficiency of Severe Stres

Apply 0.50 l/ha as soon as there is sufficient leaf area or as soon as symptoms appear. Repeat every 14 days if required.

Water rate:

Conventional sprayer : 220 litres/ha (20 galls/acre)

Low volume sprayer : 55 litres/ha (5 galls/acre)

Tank Mixing:

To test physical compatibility mix the products in the ratios to be used in a small container before performing the operation in the spray tank. For best results spray when crop is in an actively growing state. During hot weather spray early morning or late evening. This product is manufactured to a high quality specification, any residue is readily dispersible, rinse bottle with water and add to spray tank.

Conditions of Supply:

All goods supplied by us are of a high quality and we believe them to be suitable, but as we cannot exercise control over their storage, handling, mixing or use or of the weather conditions before, during or after application which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us or re-sellers for any failure in performance, damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
